

BACKFORCE STRUCTURE (STRCTR) profiles can be fitted with the following types of tape: (\*)

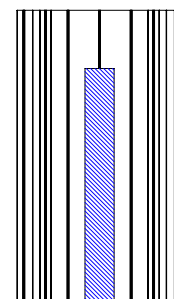

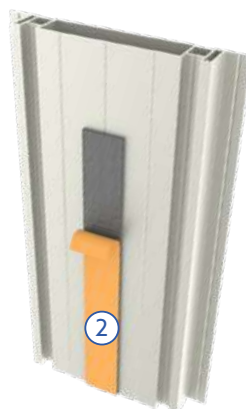

1	Damping tape BFA-530-30x2
2	Dubble-sided tape BFA-540-25x0.22

**BFP-100**

**BFP-200**

**BFP-210**

(\*) When bonding facade cladding, the facade cladding manufacturer or adhesive manufacturer may recommend different or narrower tapes, depending on the type of facade cladding. These tapes can, of course, also be used on BACKFORCE profiles. In such cases, please follow the recommendations and installation instructions provided by the facade cladding or adhesive manufacturer.
