

Reinforcement profile for horizontal use

1	Basic profile BFP-420
2	Self-drilling screw BFH-4504OH-0112
3	30° surface for diagonal load-bearing wall connection (extra load-bearing capacity)

The BFP-320 reinforcement profile was developed solely as **an additional reinforcement profile for horizontal use** of the base profiles. This short 100 mm profile can be easily attached to the base profiles using standard self-tapping screws. This allows a diagonal (additional) nail/screw plug to be inserted at an angle of 30°, thereby increasing the load-bearing capacity of the entire support structure. This is explained in more detail later in this manual.

BFP-320	Saw length (mm)	No treatment	Anodisation black	Standard CNC processed
BFP-320-B0100	100	•		
BFP-320-B6500	3250	•
